

## Quality & Environmental Statement

Marmax Recycled Products is an award-winning UK manufacturer of outdoor furniture, play equipment, planter, fencing and special educational needs equipment made from 100% HDPE recycled plastic, for example plastics which used to be milk carton.

We meet all environmental requirements prescribed by UK law, this is evidenced by internationally recognised certificates.

We also provide a clean and safe environment for our employees, customers and neighbours. This is achieved through our commitment to Quality and Environmental Management Systems that satisfy the requirements of ISO 9001:2015, BRC Global Standard for Storage and Distribution and ISO 14001:2015.

Our Management Systems are maintained by monitoring set Objectives and Targets, using internal audits, analysis of data, management reviews together with independent external audits and customer feedback.

We monitor our supply chain, the production and supply of materials and services to ensure that all operations are undertaken in an environment-friendly manner. Regarding the prevention of pollution we will encourage our suppliers and contractors to improve their quality and environmental performance.

We provide extensive training to our employees on quality and environmental benefits and assign responsibility to appropriately nominated persons.

In recognition of the importance, we have appointed a Management Representative with ultimate responsibility for all issues relating to our Management Systems. They report directly to the Directors.

We are committed to reviewing this policy on an ongoing basis and reporting the results and performance of this policy annually.
